Date: 2/28/03 7:27AM
Subject: telecommunication

SUNSHINE PERIOD

Your lack of understanding the industry has caused great harm. The largest stock holder company in the US (LU) will bear the financial blunt of your decision again and all other equipment suppliers. Verizon is right, all of the competition that the telecommunication bill was suppose to create to help the public has gone bankrupt and I don't mean World Com. We should have controls but not one's that hurt the industry and stockholders. You tried to freeze the baby bell's and created Verizon. The largest phone company in the world. The cream will always come to the top. You will be replaced and your record will show you have done very little to help the industry but show your lack of knowledge and stupid mistakes.
